Dear ladies and gentlemen,  
dear esteemed colleagues,

Join us for an insightful 19th selected lecture with the hot topic: „The Painfree Touch“ – a Dual Mobility Implant for Treatment of Basal Joint Arthritis . We are excited to welcome esteemed guest speaker Joris Duerinckx, MD, who will share his expertise on basal joint arthritis and the innovative dual mobility implant.

Dr. Duerinckx is a distinguished orthopedic surgeon with extensive experience in hand surgery. Having graduated from the Catholic University of Leuven (Belgium) and completed a hand surgery fellowship at the C.M. Kleinert Institute in Louisville (KY, USA), he brings a wealth of knowledge to the field. Notably, he initiated the hand surgery department at ZOL Hospital in Genk (Belgium) and is a board member of the Belgian Hand Group.

In his presentation, Dr. Duerinckx will delve into current treatment options for basal joint arthritis, including pros and cons for arthroplasty. He will share his experiences and insights gained from over 1.000 implants so far. Thus he is highlighting the advantages of the dual mobility implant.

Best from Munich

*Univ.-Prof. Dr. med. Riccardo Giunta*
